Summary

Adaptable Software Engineer with experience building cloud-native, full-stack applications with a strong focus on AI-driven systems. Proven expertise in Python, FastAPI, React, and Azure for designing and delivering enterprise-grade LLM solutions. Demonstrated ownership of complex backend systems, Retrieval Augmented Generation (RAG) pipelines, and agentic workflows.

Education

Master of Science in Computer Engineering

Arizona State University, Tempe, AZ

December 2023

GPA: 3.3 / 4.0

Bachelor of Technology in Electronics and Communications Engineering

National Institute of Technology Karnataka, Surathkal – First Class

May 2020

GPA: 7/10

Skills

Proficient: Python (OpenAI, FastAPI, Pydantic, LangChain), Typescript (Next.js, React, Node.js), Azure (OpenAI, CosmosDB, AI Search, AI Foundry, Storage Container, Blob), Git

Exposure: AWS (Lambda, S3, EC2), GCP (Cloud Run), Cloudflare (Pages, Workers), Docker, Linux/Unix

Certifications: Codecademy – Back End Engineer, Codecademy – Computer Science, Codecademy – Front End Engineer

Work Experience

Generalist Software Engineer, *SpurTree Technologies, Bengaluru, India*

March 2025 - present

- Led backend development of an enterprise-grade legal LLM chat application using Python and FastAPI, delivering an MVP within 2 weeks and accelerating stakeholder validation timelines.
- Designed and implemented the AI logic core with LangChain, enabling advanced tool-calling, web search, file-attachment context, and multi-stage agent workflows, improving feature extensibility and reducing new feature development effort by an estimated 30%.
- Resolved critical context-window and prompt-engineering issues, significantly improving system stability and response quality during long, multi-turn conversations.
- Developed an LLM-based query generator to optimize vector search integrated with BAInsight and iManage documents, improving document recall and relevance for complex legal queries.
- Ensured secure, compliant cloud architecture using Azure managed identities, Cosmos DB, and VPC-level access controls, strengthening data protection and system reliability.

Associate Software Engineer, *DXC Technology, Bengaluru, India*

July 2020 - July 2021

- Analyzed design specifications and technical requirements to support cloud-based data solutions, contributing to improved alignment between business needs and technical implementation.
- Developed Python-based data pipelines using Databricks SQL Connector, automating data workflows across Azure services and reducing manual processing effort.
- Loaded and managed datasets in AWS Redshift clusters, optimizing SQL queries to improve query performance and data accessibility for analytics use cases.
- Prepared and executed unit test plans aligned with business processes, improving data quality and reliability of analytical outputs.

Projects

ACP Chatbot - *Agentic Commerce Chat Interface*

January 2026

- Built a terminal-based LLM chat interface in Python using Rich, supporting streaming responses, function calling, and MCP for rapid prototyping and testing.
- Integrated Shopify Catalog MCP to enable conversational product discovery, demonstrating agentic commerce workflows.
- Implemented function tools and checkout flows aligned with Agentic Commerce Protocol (ACP), enabling end-to-end shopping, cart management, and checkout within a single chat session.

LLM Chat - *Full-Stack LLM Chat Starter*

October 2025

- Developed a full-stack LLM chat starter application using Next.js, FastAPI, and OpenAI to accelerate AI feature development.
- Implemented streaming UI with Server-Sent Events (SSE), optimizing real-time responsiveness and reducing perceived latency.
- Designed dynamic chat history management with Zustand and React Query, enabling seamless navigation, auto-updating titles, and improved state consistency.

Leadership Experience

Vice President, Brand Master, *IEEE Student Branch at ASU, Tempe, AZ*

August 2022 – December 2023

- Achieved recognition as “Board Member of the Year” during 2022-23 term.

Volunteer, *Feed My Starving Children, Mesa, AZ*

November 2023

Volunteer, *IEEE at CES 2022, Las Vegas, NV*

January 2022

Executive Member, *IET NITK, Surathkal, India*

August 2018 – April 2020
